

Anchorage mini Maker Faire®

What's
a Maker
Fair?

Maker Faire is an event that brings together families and individuals to celebrate and showcase arts, crafts, engineering, science projects and Do-It-Yourself (DIY) projects. Maker Faire is a community-based learning event that inspires everyone to become a maker and connect to people and projects in their local community. Maker Faires are held all over the country drawing thousands of Makers and families to share and learn in this amazing experience.

Hold on to your shorts folks, the first ever Anchorage Mini Maker Faire is scheduled for July 2013! Planning has already begun for the event and we are looking for creative individuals that want to be involved as a Maker, volunteer or sponsor!

Will
it be in
ANC?

How
can I be
involved?

We need your help in identifying 'Makers' in the Anchorage community. Know someone that has an invention, loves science or makes crafts? Send them our way! Want to show your love of local Makers in our community? Become a sponsor! There are multiple ways to be involved and show your support of MAKERS in Anchorage, just contact us and we will make it work.

If you are interested in learning more about the Anchorage Maker Faire and how you can get involved, please contact AEDC's Jon Bittner at jbittner@aedcweb.com or (907) 334-1205.

Who
should I
contact?
